

## Feed Technical Message 7 - Adding Farm Profit and Efficiency

The following are the key benefits of GAIN Feeds ;

- \* Complete Nutrition for all animal species.
- \* Feed is manufactured in UFAS quality approved mills.
- \* Latest technology and nutrition research employed.
- \* Convenient and cost effective feeds.

The following are key nutritional features and performance benefits of GAIN Feeds ;

- \* Protein ingredients - a combination is better than an over reliance on one or two.
- \* Energy ingredients - a combination is better than an over reliance on one or two.
- \* Fibre ingredients - a combination is better than an over reliance on one or two.
- \* Oil ingredients - a combination is better than an over reliance on one or two.
- \* Novatan boosts milk protein percentage and animal performance efficiency.
- \* Amaferm increases feed efficiency and animal performance efficiency.
- \* Agolin increases feed efficiency and animal performance efficiency.
- \* Protected Copper quality and quantity is essential and helps prevent deficiencies.
- \* Protected Zinc reduces lameness and improves Somatic Cell Count.
- \* Protected Selplex Selenium improves fertility and boosts cow immunity.
- \* Vitamin E works alongside Selenium to boost animal health.
- \* Phosphorus is required for bone formation , milk yield and animal fertility.
- \* Calcium is required for bone formation , milk yield and health.
- \* Magnesium is included to prevent Grass Tetany and Winter Tetany.

Benefits of compound feed include ;

- \* Performance - efficient animal output and health.

- \* Convenience - no extra mixing and no extra labour.
- \* Quality - ingredients are carefully selected ,controlled and assured.
- \* Consistent - nutritionally balanced with no separation or segregation.
- \* Nutrition - diet is efficient and supplies the correct balance of nutrients.
- \* Value - value for money and return on investment.

Each of the benefits add profit and efficiency.
